

ABX D45

ARCHITECTURAL BRONZE

DISCLAIMER: Technical drawings are for guidance only

Only 31 mm width for fixed frames and 48 mm for operable, the slimmest extruded profile of Astec series, latest born of a long R&D tradition, returns to lines and material purity of the past to capture the innovative today's architecture. The new ABX® D45 series for windows and doors combines refined aesthetics and avant-garde technological performance to deliver occupant comfort and security, even for extensive lights.

Perfect frame for top architectural briefs, the D45 Architectural Bronze series comes with a range of superb finishes.
