

ABX H75

ARCHITECTURAL BRONZE

ABX® H75 LIFT AND SLIDE SYSTEM

The wide range of extruded profiles in Architectural Bronze includes ABX® H75, Astec's proprietary system for thermally insulated lift and slide doors.

Tested under CE market, it demonstrates high performances in terms of Air Permeability, Watertightness and Wind Load Resistance.

In addition, the capacity to realize sliding panels up to 500 kgs in weight has allowed us to implement all the design choices.

Corrosion resistance, surface finishes that improve with time and long-duration, 100% recyclable, anti-microbial material: the truly unique features of Architectural Bronze ABX® make it suitable for all top-end window and door needs.

**ABX® H75 and
European CE Mark**

Typology:
2-leaf lift and slide
with fixed side lights

Size:
3395x3000h mm

Air permeability
(EN 1026 - UNI EN 12207)
Class 3

Watertightness
(EN 1027 - UNI EN 12208)
Class 8A

Resistance to wind load
(EN 12211 - UNI EN 12210)
Class C4
